1. EVERY CHILD WITH DIABETES IS DIFFERENT.
   Each and every child with diabetes may have different symptoms of low blood sugar. Although many of the symptoms
   may be similar, they will not always be the same. Situations that can affect your student’s blood sugar are: insulin, food
   intake, exercise, illness, stress and/or any changes in routine. Soon you will get to know your own student’s unique
   individuality and their typical reactions to low blood sugar.

2. DON'T DRAW UNNECESSARY ATTENTION TO YOUR STUDENT'S CONDITION.
   Your student with diabetes may have to eat snacks periodically in the classroom. In addition to your student’s designated
   snack time, remember that he or she MUST eat whenever they feel low. This is imperative, especially if the student is
   unable to have his or her blood sugar level checked first. This is NOT a choice for the child with diabetes, but a necessity!

3. PROVIDE INCONSPICUOUS AND GENTLE REMINDERS.
   Pay close attention to your student’s regular snack time. Not all children (especially the very young) can tell time, or are
   going to remember their snack time. If you haven’t noticed them eating, pass them a note or work out a special
   “password” between the two of you that reminds them of their snack time.

4. DO NOT PUT A “LABEL” ON THE STUDENT WITH DIABETES.
   Never single a child with diabetes out as the “diabetic” kid. First and foremost, the child with diabetes needs and wants to
   feel unique and special, just like every other student in your class.

5. DO NOT SYMPATHIZE: EMPATHIZE.
   A child with diabetes does not want or need your sympathy. These children need understanding, acceptance and support.
   Educate yourself in every way possible about diabetes. Learn how it may affect them and have compassion for how they
   must live their lives each and every day.

6. ALWAYS BE PREPARED.
   Always carry a quick and portable snack WHENEVER you and your student with diabetes leave the classroom or the
   school grounds. This is especially important during fire drills, earthquake drills, field trips, special presentations and/or
   assemblies. A small can of juice together with crackers may work best.

7. USE THE BUDDY SYSTEM.
   If your student with diabetes tells you he or she feels low, then give the student a quick-acting carbohydrate snack such
   as fruit juice, regular soda, or glucose tabs. If your student needs to see the nurse, ALWAYS send a “buddy” (someone
   who won’t object) with them. Never leave a child alone or sent anywhere alone when experiencing low blood sugar.

8. ALLOW UNRESTRICTED BATHROOM BREAKS.
   When given the opportunity, let the child with diabetes know that it’s okay to go to the bathroom WHENEVER necessary
   and have a water bottle when blood sugar is high. If their blood sugar is running high, their body’s natural response is to
   eliminate the extra glucose by using the bathroom. Don’t make them feel embarrassed by having to ask you for
   permission.

9. BE PATIENT.
   Be patient if the student with diabetes has minor problems with organization. High and/or low blood sugar levels may
   make it difficult for them to concentrate at times. You may have to repeat some things, especially if they’ve been to the
   nurse’s office during class time.

10. KEEP THE LINES OF COMMUNICATIONS OPEN.
    Always work as a team with the student, caregivers, school nurse and other educators. If there is a special school party or
    occasion where “treats” are to be served, let the family know in advance, if possible. This allows the family to discuss the
    options with the child so that he or she can make responsible choices. Often, many treats can be worked into the child’s
    meal plan.

11. KNOWLEDGE IS POWER.
    Learn as much as you can about diabetes in children. Consider completing a training to enable you to perform essential
    key diabetes care tasks such as blood glucose monitoring and insulin and glucagon administration. Your willingness to
    learn about diabetes and being prepared to perform care tasks or provide supervision as necessary will ensure a safe
    classroom environment and enable your student to attain optimal academic performance.
